

APPROVED  
By order of Senior Executive Officer of  
Private company International Trading System Ltd  
№27/4 from «27» January 2026

**ITS WORLD INDEX  
METHODOLOGY**

January 2026

## 1. Terms and Definitions

1.1. For the purpose of this document, the defined terms used herein shall have the following meaning:

**Business Day** is a weekday defined as a workday by the Republic of Kazakhstan legislation.

**Closing Price** is a security's final regular hours Trading Price published by the Respective Trading Facility and determined in accordance with the Respective Trading Facility regulations.

**Corporate Action Guideline** is a guideline for corporate actions for indices owned by Index Administrator.

**Effective Date** is a date of new Index Composition to come into force as defined in Appendix 2A.

**Eligible Component** is a financial instrument, may be an ordinary share, a global depository receipt (GDR) or an American depository receipt (ADR) currently included in the official Trading List.

**Ex-date** is the day, in which and after which the shares are sold without the right to receive dividends on them.

**Index** is a number describing the average value of its Index Components and their development over a longer time period.

**Index Administrator** is Private Company 'ITS Limited'.

**Index Component** is a financial instrument, which is included in Index Composition.

**Index Composition** is a list of Index Components.

**Index Universe** is a list of Eligible Components, which fulfill the requirements in Section 3.

**Issuer** is an Index Component's issuing company considered to be included in an Index Composition.

**Market Capitalization** with regard to a share is the value of the issuing company calculated by multiplying the number of outstanding shares by their Closing Price. Index Administrator defines Average Market Capitalization on every Rebalance Day.

**Methodology** is a document ruling the composition, calculation and maintenance of an Index.

**Rebalance** is the adjustment of an Index to implement the Index Composition dictated by the respective Methodology.

**Rebalance Day** is a day when the Index is rebalanced.

**Respective Trading Facility** is an exchange or a multilateral trading facility (MTF) where the Index Component is traded. The Respective Trading Facilities are listed in Appendix 4.

**Schedule** is a schedule of the Index Rebalance outlined in Appendix 2A.

**Trading Day of the Instrument** is the day when trading takes place on the Respective Trading Facility of the instrument.

**Trading List** is the list of securities admitted to trading at Respective Trading Facilities.

**Trading Price** in respect of an Index Component and a Trading Day of the Instrument is the most recent published price at which the Index Component was traded on the Respective Trading Facility. It can be:

- Market price is the current price at which a security can be bought or sold.
- Mid price is the average of the current bid and ask prices being quoted.
- Ask price represents the minimum price that a seller is willing to take for a security.
- Bid price represents the maximum price that a buyer is willing to pay for a security.

**Website** is an official Index Administrator website: [www.itsx.kz](http://www.itsx.kz)

1.2. Terms that are not defined in the current Methodology are used in accordance with strict rules regarding the exercise of discretion or Index Administrator documents and legislation expert judgment (including IOSCO Principles for Financial Benchmarks).

## 2. Underlying principles

2.1. Index represents the performance of 50 Market Cap-Weighted equity securities, which have the highest Market Capitalization and are included in the Trading List.

2.2. Number of Index Components can be affected by corporate actions processing and remain below or above 50 until the next scheduled Rebalance, unless unscheduled Rebalance is implemented instead.

2.3. Senior Executive Officer is responsible for decisions regarding any amendments to Methodology. Senior Executive Officer approves any such amendment, after which new Methodology is disclosed on the Website.

## 3. Index Universe requirements

The Index Universe is composed of all Eligible Components, which fulfill the below requirements.

3.1. Real estate investment trusts (REIT) and special-purpose acquisition companies (SPAC) are not to be included in Index Universe.

3.2. In case of an Index Component's Issuer being bankrupt or insolvent, Index Administrator cannot include this security in Index Universe.

3.3. Index Administrator may impose a restriction on Eligible Components.

## 4. Rebalance Schedule

4.1. Index is rebalanced according to the schedule of the Index Rebalance outlined in Appendix 2A.

4.2. On the Rebalance Day Eligible Components are determined in accordance with Sections 5 and 6 herein, and then, the Index Composition is constructed.

4.3. Index Composition is disclosed on the Website with a notice period of at least 2 (two) Business Days. Index calculation with the new Index Composition is implemented on the Effective date described in Appendix 2A.

- 4.4. Unscheduled Index Rebalance may be implemented at terms not defined on the Schedule by the decision of the Senior Executive Officer if:
- 4.4.1. Index Component's Issuer files for bankruptcy.
- 4.4.2. Respective Trading Facility suspended trading in Index Component for more than one Trading Day of the Instrument.
- 4.4.3. Index Component is removed from the Trading List.
- 4.4.4. There is relevant information about Index Component that prevents it from being included into Index Composition.
- 4.4.5. There is a corporate action that affects the business of the Issuer, which may significantly influence Index performance and cannot be processed or treated as defined in Corporate Actions Guideline.
- 4.5. Index Administrator discloses an unscheduled Rebalance Day on the Website. Effective date is determined in accordance with Appendix 2B.

## 5. Rebalance

5.1. Based on the Index Universe, the initial composition of the Index as well as any selection for an ordinary rebalance is determined under the following rules:

5.1.1. The Universe is divided into 4 regions (Americas, Europe, Asia and the Republic of Kazakhstan) and ranked in descending order by the 3 (three) months Average Market Capitalization.

5.1.2. The first 50 Index Components are selected to form the Index Composition

5.1.3. Capping procedure is implemented to avoid excessive concentration in any region and ensure a diversified allocation. The cap is applied to the weight of the region in Index and the number of Index Components for each region described in Appendix 2C.

5.2. The target weight  $W_i$  of an Index Component reflects the proportion of this stock at the index level  $I_t$  after the Index Rebalance Day  $t$  takes place and calculated based on target weight  $w_i$  of an Index Component in the region  $r$  and weight of the region in Index  $R_{r,t}$ . The target weight  $w_i$  of an Index Component in the region  $r$  is calculated based on cumulative 3 (three) months Average Market Capitalization  $AMC_i$ :

$$w_i = \frac{AMC_i}{\sum_i^{Nr} AMC_t}$$

$$\sum_i^{Nr} w_i = 1$$

$$W_i = w_i * R_{r,t}$$

$$\sum_i^N W_i = 1$$

5.3. Fraction of shares of the Index Component  $S_{i,0}$ , at the time of the first Index calculation, is determined as:

$$S_{i,0} = \frac{W_i}{px_{i,0}} * I_0$$

Fraction of shares of the Index Component  $S_{i,t+1}$ , starting the second and the following Rebalance dates, is determined as:

$$S_{i,t+1} = \frac{W_i}{px_{i,t}} * \sum px_{i,t} * S_{i,t}$$

5.4. If the currency of an Index Component differs from the currency in which the Index is calculated, the exchange rate is used to convert the price into the currency in which the Index is calculated. The exchange rate can be an official rate of the National Bank of the Republic of Kazakhstan or another source chosen by the Index Administrator. Index Administrator can use different sources of exchange rates for different currencies following the best market practices. The exchange rate source change is disclosed on the Website.

5.5. If the weight  $w_{i,t}$  of one or more Index Components (or the sum of all weights for the Index Components of one Issuer) in the region  $r$  exceeds 10% on a Rebalance Day, excess weight value is distributed among the remaining Index Components from the same region proportionally.

5.6. If the weight  $w_{i,t}$  of one or more Index Components (or the sum of all weights for the Index Components of one Issuer) in the region  $r$  exceeds 10% on any date between the Rebalance Days, the Index Administrator has the right to revise the weights of Index Components in accordance with clauses 5.1-5.3 of the Methodology, given the Index Composition remains the same. Notice of unscheduled Index Rebalance is published on the Website and takes effect on the Effective date of the changes specified in Appendix 2B.

5.7. Senior Executive Officer may influence Index Composition by including and/or restricting Eligible Components.

## 6. Index calculation

6.1. Should there be no current Trading Price for an Index Component, the later of: (i) the most recent Closing Price; or (ii) the last available Trading Price for the preceding Trading Day is used in the calculation.

6.2. In the calculation of the daily closing levels of the Index, the official Closing Price of the respective Index Component on the Respective Trading Facility is used. If the Respective Trading Facility does not provide an official Closing Price for an Index Component on a particular day, the Index is calculated with the last price available.

6.3. The current index level, excluding the case described in Section 6.5, is disclosed:

- On the Website no later than one minute from the moment of its calculation
- In the application programming interface (API) no later than 15 seconds from the moment of its calculation

6.4. The Index is calculated every 15 seconds on each calculation day from 10:00 till 03:45 UTC+5 of the next day. The first index level is an opening level of the Index for a calculation day. The last index level is a closing level of the Index for a calculation day.

6.5. Index Administrator preserves the right not to recalculate and not to publish the Index level if the majority of Index Components is not traded on the Respective Trading Facilities. Majority, in the context of Index Components, is defined as 80% regardless of the Trading Facility.

6.6. Index Administrator can suspend calculation or recalculate index levels for the current calculation day or another period in case of errors in the determination process for various reasons (internal or external, including data unavailability or data sources failure).

6.7. Recalculation is implemented right after all the errors were corrected. Notification of the recalculation and new index levels is disclosed on the Website.

6.8. In case of no Index calculation for over five hours per calculation day due to errors in the determination process, there is no recalculation or disclosure of missing values.

6.9. The index level is the sum of the products of the fraction of shares of the Index Component  $S_i$  and the price of the Index Component  $S_i$  at the Respective Trading Facility divided by a divisor  $D_t$ :

$$I_t = \frac{1}{D_t} * \sum p^{x_{i,t}} * S_{i,t}$$

6.10. The index level is rounded to two decimal places.

6.11. The initial level of the divisor equals:

$$D_0 = \frac{1}{I_0} * \sum p^{x_{i,0}} * S_{i,0} = 1$$

## 7. Miscellaneous

7.1. Index Administrator can end Index calculation. Notification of cessation of the Index is disclosed no later than 14 calendar days before estimated last calculation.

7.2. Index Administrator determines the Index Composition and Index calculation in accordance with the best market practices, national regulations, guidelines owned by Index Administrator and decisions of the Senior Executive Officer.

7.3. Index Administrator does not guarantee that Index reflects future market indicators.

7.4. The publication of the Index by Index Administrator does not constitute a recommendation for capital investment and does not contain any assurance or opinion of Index Administrator regarding a possible investment in a financial instrument based on this Index.

Currency	USD
Initial level	1000
Start date	10 August 2023
Calculation frequency	Every 15 seconds

### **Symbols**

$AMC_i$	Average Market Capitalization
$d$	Amount of Dividend
$D_t$	Divisor
$I_0$	Index level at the time of the first calculation
$I_t$	Index Level
$N$	Number of Index Components on Business Day $k$
$Nr$	Number of Index Components in the region $r$
$px_i$	Price of Index Component
$px_{i,t}$	Trading Price of the Index Component in USD
$t$	Moment of Index calculation
$tax_i$	Withholding Tax
$r$	Region of the Index Component
$R_{r,t}$	Weight of the region $r$ in Index
$S_i$	Fraction of Shares of the Index Component
$W_i$	Target Weight of the Index Component
$w_i$	Target Weight of the Index Component in the region $r$
$X_t^\alpha$	Any parameter after dividend adjustment

**Appendix 2A**  
**Ordinary Rebalance Schedule**

Ordinary Rebalance is conducted every 3 (three) months, beginning on the initial Rebalance prior to the Index launch:

Rebalance date	Effective date
4 February	4 <sup>th</sup> Trading Day following the Rebalance day
4 May	
4 August	
4 November	

In case the Rebalance date falls on a non-Trading day, the Rebalance date is scheduled on the next Trading day.

If the Effective date falls on a weekend or a public holiday, in accordance with the Republic of Kazakhstan legislation, the changes will take effect on the following day, which is both a Business Day and a Trading Day.

**Appendix 2B**  
**Unscheduled Rebalance**

In an event of unscheduled Rebalance, the Effective date is to be scheduled on a Business Day, which is also a Trading Day, as defined hereinabove.

**Appendix 2C**  
**Regional Quotas for Index Rebalance:**

Region	Number of Index Components	Quota
Asia	15	30%
Americas	18	38%
Europe	13	28%
Kazakhstan	4	4%

## Appendix 3 Index Net and Index Gross calculation

Besides Index calculation, Index Administrator calculates Index Net and Index Gross, which consider dividends.

### 1. Index Net and Gross calculation

1.1. Indices Net and Gross are calculated according to Methodology.

1.2. Besides the provisions of Methodology, a divisor adjustment applies to record regular dividend and special dividend.

### 2. Divisor adjustment calculation

2.1. Dividends are distributed among Index Components through divisor adjustment proportional to the fraction of shares.

2.2. Index Gross is calculated after the deduction of any withholding tax:

$$tax_{gross} = 0$$

2.3. Index Net is calculated with the deduction of any withholding tax in an amount of 30%:

$$tax_{net} = 0.3$$

2.4. Special and regular dividends are considered equivalent.

2.5. If the amount of payment  $d$  is known before the ex-date, the divisor after adjustment is determined as:

$$px_{t+1}^{\alpha} = px_t - d * (1 - tax_i)$$

$$D_{t+1}^{\alpha} = \frac{\sum(px_{i,t+1}^{\alpha} * S_{i,t+1}^{\alpha})}{\sum(px_{i,t} * S_{i,t})} * D_t$$

2.6. If the amount of payment  $d$  is specified on day  $t \geq t_{ex}$  (after ex-date), the divisor is determined in two steps:

a. On ex-date  $t_{ex}$  the divisor is adjusted using an estimated payment  $d_{est}$  in accordance with adjustment rules defined in Section 2.5.

b. On day  $t$  the divisor is adjusted using the actual value of payment  $d$ :

$$I_t^{\alpha} = I_t + \frac{(d - d_{est}) * S_{t_{ex}} * fx_t * (1 - tax_i)}{D_{t_{ex}}}$$

$$D_t^{\alpha} = \frac{I_t}{I_t^{\alpha}} * D_t$$

## Appendix 4 Respected Trading Facilities

Short name	Full name	Website
ITS Ltd	International Trading System Limited	<a href="https://itsx.kz">https://itsx.kz</a>
AIX	Astana International Exchange	<a href="https://aix.kz">https://aix.kz</a>
